I am a front end developer and have come to also enjoy back end development. I am a fast and focused learner and am keen to learn new languages.

Work Experience

Incuna

Full Stack Developer	February 2015 - Present
Developer	September 2015 - January 2016
Junior Developer	February 2015 - August 2015

- Developed 10 + front end web applications with Javascript using Angular/Backbone framework, for a wide range of clients. Writing tests in Karma and Protractor. Developing the user interface with Html5 and Sass.
- Multi browser and device testing. Where possible read hardware is used otherwise Browserstack is the main platform for cross browser/device testing.
- Developed 5 back end applications using Rest APIs in Python and Django, with Django rest framework. Using test driven development with Django tests.
- Using 3rd party Django packages and extending/overriding certain parts for use.
- Clients include: Abbvie, Teva and AstraZeneca.

Agility Works

Junior Developer	October 2013 - January 2015

- Migrating from Subversion to Git.
- Manual app testing with an Ipad following a test script I wrote.
- Debugging Objective C code.
- Setting up Jenkins for continuous integration.
- Developed one Cordova application using Javascript and the Ember JS framework with Handlebars. This was a travel and expenses app for a big pharmaceutical client. The app has SAP integration.
- Developed a product ordering demo for Lego.
- Clients include: Johnson & Johnson, GSK and Lego.

Computer skills
